

IN-CAR VIDEO FOR LAW ENFORCEMENT

IN-CAR VIDEO FOR LAW ENFORCEMENT

**CAPTURE EVERY INCIDENT.
RECORD EVERY ENCOUNTER.**

For law enforcement, reducing crime is priority number one and video evidence has long been a way to corroborate policing and bring justice to perpetrators. Motorola Solutions' In-Car Video system allows in-field officers to:

- Gather visual evidence from multiple vantage points
- Aid decision making
- Maintain a secure tamper proof record for evidence
- Share footage and information in real-time
- Maintain a record of officer transparency
- Save time through automation

STRATEGIC BENEFITS

Motorola Solutions' In-Car Video system allows Police Forces in the United Kingdom to deliver on their key priorities by reducing crime, creating better outcomes for victims, increasing safety of front line officers and improving overall community confidence.

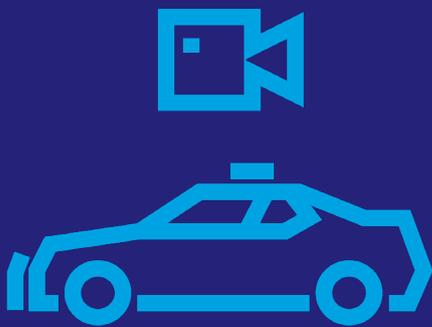

Our In-Car Video system further provides Police Forces with a range of workforce and cost benefits including being easily deployable and the ability to add the system on top of existing in use IT systems rather than having to do a complete overhaul, ensuring that in-field officers do not need to be re-trained on new or difficult to use technology.

OPERATIONAL BENEFITS

The Motorola Solutions In-Car Video system is secure, reliable and rugged technology. In simple terms - it works at all times without hassle. The system supports the National Police Chiefs Council's roads policing strategy and contributes to safer roads, free from harm; more secure roads free from threat of serious crime and more efficient roads promoting public satisfaction and confidence. More comprehensive evidence leads to better convictions and ultimately safer and more confident communities.

PRODUCT CAPABILITY

- Intuitive and easy to use touch screen interface allowing officers in-vehicle control.
- Captures evidence from multiple vantage points through numerous cameras with panoramic and zoom features, on the windscreen, in the vehicle and in the back seat of the Police Car.
- Configure settings centrally and remotely to ensure fewer maintenance needs.
- Evidence is available immediately and can be automatically uploaded via LTE or Wi-Fi.
- Automatic upload combined with live streaming enables live monitoring of incidents, granting remote decision makers real-time information as the event is unfolding.
- Easily integrates with your Police Force's existing in-use IT systems.
- Enables real-time footage sharing.
- Integrates with body-worn cameras, in-car and on-officer radio systems to create a 360 degree view of any situation.
- Rugged camera devices.
- Number plate recognition technology.
- Covert recording mode.
- Records in four resolutions that are configurable depending on your needs.
- Synchronised playback and incident timeline creation with automatic video and audio recording when any camera is activated or triggered.
- Maintain the integrity of evidence with on-device storage.
