PROTECT YOUR ASTRO® SYSTEM WITH MANAGED DETECTION AND RESPONSE SERVICES

CYBER ATTACKS CAN LEAD TO COMMUNICATION DOWNTIME

Radio systems are increasingly complex as data sources and advanced technologies become increasingly integrated. As a result, these systems can be taken offline by ransomware and other cyber attacks. With attacks becoming more frequent and sophisticated, detecting and responding to potential threats quickly is key to defending these systems.

STAY AHEAD OF THREATS

For years, multiple levels of redundancy and fallback have protected ASTRO radio systems from physical threats. Today, there are increasing risks from cyber attacks that can disrupt communication and put sensitive information at risk. As these attacks become more frequent and sophisticated, and mission critical communications systems become connected to other IP-based systems, identifying potentially malicious activity and responding to threats quickly is key to defending against them.

Our Managed Detection and Response services monitor security infrastructure and systems 24/7 in the ASTRO Radio Network Infrastructure (RNI), as well as Customer Enterprise Networks (CENs) and IT networks. In addition, because we constantly monitor public safety networks, we are uniquely positioned to provide threat intelligence specific to them. This gives us deep insights to better protect against threats targeting these systems.

SYSTEMATIC APPROACH TO MITIGATE RISKS

DETECT
Proactive event monitoring & automated alerts

ANALYZE
Real-time analysis correlation

INVESTIGATE
Incident investigation and evaluation

REPORT
Advanced data analytics

MOTOROLA SOLUTIONS

24/7 MONITORING FOR MALICIOUS ACTIVITY

Motorola Solutions' Security Operations Center (SOC) has experienced, highly-trained and certified security professionals staffed 24/7 dedicated to monitoring mission-critical systems. Using automation and analytics, our ActiveEye security platform can pinpoint real threats while reducing false positives and omissions. A combination of Log Collection/Analytics and Network Intrusion Detection technology constantly monitors for signs of malicious traffic inside your network. From this, actionable tickets can be assigned, investigated and resolved.

ENHANCED SECURITY FOR RNI AND CEN

Managed Detection and Response coverage includes both the ASTRO Radio Network Infrastructure (RNI) and the Customer Enterprise Network (CEN). Our Managed Detection and Response services can monitor a wide variety of non-Motorola Solutions, industry-standard IT infrastructure in the CEN through a rich catalog of service connectors.

CO-MANAGED SINGLE PANE OF GLASS VIEW

Our cloud-based ActiveEye platform provides a single pane of glass for your operations team to monitor the security of your infrastructure, ensuring you're always in the loop. Staying informed is as easy as setting up notifications channels that match the way you work. Whether you prefer to communicate via Slack, Teams, PagerDuty, email or phone, the ActiveEye team can easily stay in touch. As a co-managed security solution, the ActiveEye platform ensures you have 24/7 visibility and can see what our SOC analysts see. You can perform your own investigations and data analysis as needed or if you prefer, have our SOC analysts manage this.

PROTECT CLOUD, ENDPOINTS AND IT NETWORKS

Our Managed Detection and Response services offer coverage far beyond your RNI and CEN. Our SOC team uses our ActiveEye platform to investigate and respond to cyber threats wherever they appear — whether in your cloud environment, network or endpoints. We protect your endpoints to block most threats, and take immediate action to stop anything that makes it through from spreading. We can investigate and remediate any issues to protect your IT network, and monitor cloud applications and infrastructure security activity and configurations for new threats and attack vectors.

MOTOROLA SOLUTIONS — YOUR TRUSTED PARTNER

As a leading provider of mission-critical solutions, we understand your mission can only be as secure as your partners enable you to be. Our goal is to provide you with transparency, accountability and security that's built-in from the start.

We believe that our set of highly knowledgeable people with industry certifications, best-in-class organizational policies and procedures and state-of-the-art automation and analytics tools enables us to uniquely deliver enhanced cybersecurity solutions that address your needs today and in the future.

GLOBAL SCALE & EXPERIENCE

300+
SECURITY EXPERTS FOCUSED ON 24/7 MONITORING & RESPONSE

9B
SECURITY EVENTS PROACTIVELY MONITORED EACH DAY

100%
CO-MANAGED APPROACH FOR VISIBILITY AND CONTROL

20+
YEARS OF EXPERIENCE DEVELOPING CYBERSECURITY SOLUTIONS

GET COMPLETE VISIBILITY INTO YOUR SYSTEM

Our ActiveEye security platform provides a comprehensive view of the overall security risk posture of your system. As a co-managed security solution, ActiveEye gives you 24/7 visibility so you can see what our SOC analysts see.
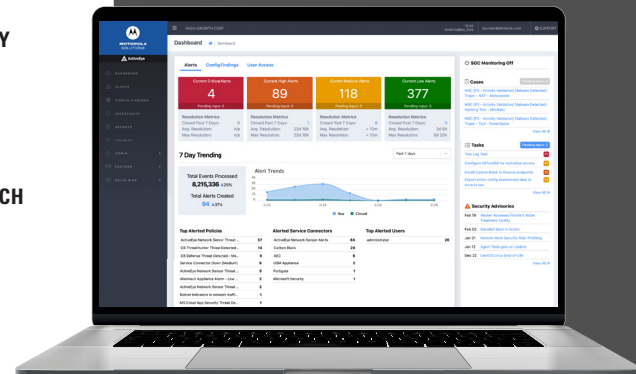

Get complete visibility into all security activity via a single view.
