

VIGILANT MOBILE COMPANION

LAW ENFORCEMENT

At the crime scene or in the field, Vigilant Mobile Companion allows officers to scan plates and faces, as well as receive real-time alerts.

WITHOUT VIGILANT MOBILE COMPANION

At the crime scene, officers use paper and pencil to document license plates and are simply unable to ID a detained suspect unwilling to give their name.

WITH VIGILANT MOBILE COMPANION

With the click of a smartphone, license plates are quickly scanned and uploaded for analysis. Officers can also easily take a picture of the suspect's face in order to get a positive ID.

VIGILANT MOBILE COMPANION IN ACTION

Within a few days of using the app I made a felony arrest for auto theft and recovered several other stolen cars, one of which was related to an out of state burglary series. This will definitely be a great resource to officers in the field.

- AUTO THEFT DETECTIVE, ARIZONA LAW ENFORCEMENT AGENCY

REDUCE CRIME

INCREASE OFFICER SAFETY

INCREASE PRODUCTIVITY

INTELLIGENCE IN THE PALM OF YOUR HAND

Vigilant Mobile Companion provides access to these features:

SCAN PLATES

Single-plate and multi-plate scanning

SCAN FACES

Face imaging and data upload

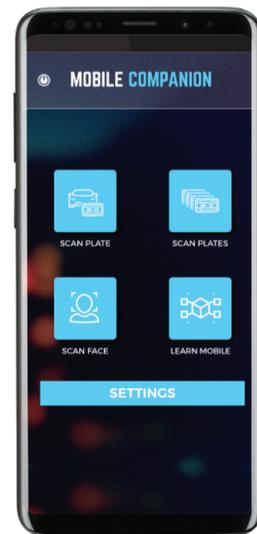

LEARN MOBILE

Advanced analytics and search capabilities

EXTEND THE REACH OF VIGILANT LEARN

With Vigilant Mobile Companion, officers can:

- Quickly capture and upload the license plate and supporting vehicle imagery of a car abandoned at the crime scene – without compromising data integrity.
- Set Vigilant Mobile Companion to multi-plate mode to easily drive the area around the crime scene and capture plates of nearby vehicles at scale, saving time and manpower.
- Capture a facial image of a person in the field, scan the bar code on a state ID and send data directly to the Vigilant FaceSearch gallery for immediate investigative use.
- Access the same analytical tools found in Vigilant LEARN to identify associated vehicles, predict probable vehicle locations and more, directly from within Vigilant Mobile Companion.
